PROFILE

Software engineer with a unique blend of technical expertise and business acumen, holding bachelor's degrees in both Software Engineering and Business Administration & Information Systems. I build practical, user-focused web products and connect technical work with real business needs — shipping production websites and platforms for clients across Ethiopia.

SELECTED PROJECTS

Elume — Furnished Apartment Rental Platform elumeapartment.com
Next.js, React, Booking Platform, Admin Dashboard

Rental platform for Addis Ababa where guests browse furnished units, view photo galleries, and book online, with a companion admin dashboard for owners to manage listings and reservations end to end.

Legacy Law Firm — Firm Website legacylawfirmethiopia.com
Next.js, React, Tailwind CSS, Responsive Design

Website for a full-service Ethiopian law firm presenting practice areas, firm history, and testimonials, with fee calculators and one-tap consultation booking across email, phone, WhatsApp, and Telegram.

Tabu Construction — Corporate Website tabuconstruction.com
Next.js, React, Tailwind CSS, Responsive Design

Corporate site showcasing services, completed projects, and expertise, giving the business a credible online presence and a central hub for prospective clients.
