Nathnael Semere

SKILLS

Front-end frameworks: react, next.js

Programming languages: Typescript, Python, sql, html5, css,

Testing: Playwright, cypress, react testing library

Performance optimization: lazy loading, code splitting, browser rendering principles

Version Control: Git

Tools and platforms: GitHub, Firebase, MongoDB, PostgreSQL, Vercel

Core concepts: Responsive design, RESTful APIs, Agile methodologies, project management, UI/UX design principles

EXPERIENCE

Resolution Studio, Addis Ababa – Software Developer

January 2026 – PRESENT

- Spearheaded the development of corporate websites utilizing **WordPress** and the **Uncode theme**, delivering responsive and high-performance digital experiences.
- Modernized the frontend stack by integrating **React** and **Tailwind CSS** into existing projects, improving UI consistency and development speed.
- Translated Figma designs and brainstorming concepts into fully functional, cross-browser compatible code.
- Architected and developed a backend service using **Hono** and **TypeScript**.
- Fostered a collaborative team environment by actively participating in technical **brainstorming sessions** and sprint planning meetings.
- Refined requirements and solved complex problems through direct **communication with coworkers** and stakeholders

Syntax Software Solutions, Addis Ababa – Full-stack developer

June 2025 – January 2026

- Found and manage a software solutions company, responsible for all operations including customer acquisition, project scope definition, and business development.
- Optimizing build configurations reduced build time from 8 minutes to 2 minutes, improving team development efficiency.
- We designed and implemented a component library that increased code reusability by 70% and significantly shortened development time.

- Leading the way in customer relationship management, we successfully delivered projects for clients in the construction and tourism industries, achieving 100% customer satisfaction.
- Develop project timelines and budgets, and consistently deliver solutions that meet technical requirements and financial constraints.

Cashflow, Remote – *Shopify Developer*

March 2026 – Current

- Developed user-friendly applications that increased customer engagement and streamlined processes.
- Collaborated with cross-functional teams to gather requirements and deliver effective software solutions.
- Resolved technical issues by troubleshooting software and delivering prompt support to users.
- Resolved technical issues by troubleshooting software and delivering prompt support to users.
- Participated in Agile ceremonies to facilitate project planning and progress tracking.

EDUCATION

Hilcoe School of computer science and software engineering, Addis Ababa – *Software Engineering*

july 2021 – june 2025, 4 kilo

Software engineers specializing in full-stack development and infrastructure optimization.

They have extensive experience in designing robust APIs, managing environments, and

implementing CI/CD pipelines to simplify deployment. Skilled at solving complex architectural challenges and mentoring junior developers to maintain high engineering standards.

Ranked in the top 20% of the class, and received the honor of being listed on the Dean's List for

three consecutive years.

I have software engineering internship experience at Brana Technology, focusing on writing scalable

code and collaborating in agile workflows

Addis Ababa School of Commerce, Addis Ababa – *Business Administration and Information System*

He has a dual academic background in software engineering and business administration and

information systems.

It has a unique ability to align technical architecture with strategic business objectives.

Proficient in full-stack development and team leadership, with a deep understanding of information system management, data-driven decision-making, and organizational efficiency.
